Grand Central and Victoria Will Pay \$22,500.

MAKES \$235,500 IN MONTH

PITTSBURG, OF ALTA, JOINS LIST | be OF SHIPPERS.

By the action of the directors of the Grand Central and Victoria Mining com-panies, the headquarters of which are in Provo, \$22 500 was added to the amount of dividend money that Utah mines will

BOSTON OPERATORS HERE.

Bought Mines in Nevada and Will Make Headquarters in Salt Lake.

E. C. Mellen and H. F. Quint, who, for themselves and Boston associates, made a \$40,000 payment on the \$90,000 purchase price of the famous Sarras copper property, south of Hawtnorne, in Esmeralda county, Nevada, one week ago, came in from San Francisco vesterday to remain several days looking after other business interests in this section, interests which have, presumably, not nterests which have, presumably, not little to do with the handling of zinc

interests which have presumably, not a little to do with the handling of zinc orce.

Mr. Mellen, who is one of the chief men in the deal involving the purchase of the Nevada copper property, stated during the afternoon that it is the intention to go right ahead with the development of the mine with the purpose of getting it in shape for steady production with as little delay as possible. Whoether it will be eventually equipped with a smelter. Mr. Mellen said was something for the future to determine. He had seen much of the fallacy in mining that resulted in the building of mills and smelters before it was known that the property required either, and he was sure that salt take is a good place in which to establish headquarters, and on that account it is quite possible that the business which we have and may have hereafter to take care of in this region will all be managed from this point. Salt Lake is a yery central point for anybody having business to do in the west, and its importance in this respect is beginning to be recognized more and more."

ANOTHER NEW SHIPPER.

ANOTHER NEW SHIPPER.

Pittsburg Consolidated of Alta in Market With Fine Ore.

Another shipper from Alta has made is appearance in the list. The initial arload of ore from the Pittsburg Conolidated was on the market vestereay nd the management expects to follow it with several more before the snows close he roads for the winter. Control asays showed the ore contained 56.3 per ent lead, 16.3 ounces silver, 13.2 per cent ron, 1.7 per cent zine and 40c in gold er ton. The lot sold for close to \$15.

while the Pittsburg has not yet reached that stage of development where it can be classed with the big mines of the camo, yet it has progressed far enough to shatter all doubt as to what it will amount to when its ledges have been fully opened. The permanency and worth of the ore shoots are firmly established and it is now simply a matter of adequate equipment and its intelligent expenditure of money to make of it a fine paying proposition.

TIBBALS' NEW COMPANY.

Organizes to Operate Property in the Goldfield District.

articles of incorporation of the Gold Articles of incorporation of the Gold-field Gold & Copper company were yes-terday filed in the office of J. U. El-dredge, jr., county clerk. The company is capitalized for \$1.000,000, divided into \$1 shares, of which William H. Tibbals sub-scribes \$99,96, with 500,000 shares left in the treasury. W. H. Tibbals is president; D. P. Roblifing, vice president; W. F. Adams, treasurer, they with Hoffman Richards and A. W. Tibbals constituting the board of directors. The company owns the Rachel B. Rachel B. No. 2, Rachel B. No. 2, Rachel B. No. 3 and Rachel B. No. 4 claims in Goldfield, Nev., mining district.

BACK FROM CHICAGO.

Local Mining Man Says Utah and Its

Future Is Much Talked About. William Ochs, the well known mining man, who has been identified with some of the biggest mining deals that have been consummated on Utah and Idaho propositions during the last few years, and who is still intelligently working to interest capital in the good things which the rich districts of Utah have to offer, returned Saturday night from a two weeks' business trip to Chicago.

While Mr. Ochs declined to discuss in any manner the business that had taken him to Chicago, he said there was more talk of Utah and its mines, its railroad growth and future possibilities in a commercial sense than he had heard in a long time.

NEVADA ORE SHIPMENTS.

Week's Output From Tonopah and Surrounding Camps.

The ore shipments over the Tonopah railroad last week aggregated 2,009 tons, of which 347 tons came from Goldfield. The shipments are divided as follows:
From Tonopah—Tonopah company, 455 tons; Tonopah Extension company, 415 tons; Montana-Tonopah, 50 tons; Belmont, 100 tons; Midway, 30 tons; North Star, 30 tons; Gold Mountain, 23 tons.
From Goldfield—Goldfield Sampling Ore company, 347 tons. From Lone Mountain-Nevada-Alpine, 29 tons.

MONTANA-TONOPAH ANNUAL.

Battle for Control of Directorate Will Be Fought Out Today.

friends and on the other Judge W. H. Dickson, Maicolm L. McDonald, A. C. Ellis, ir. and their adherents. Most of the heavy shareholders and practically all of the directors in the company were on the ground yesterday and, from what could be learned during the afternoon, nothing but a voite will determine where the greater strength lies.

Matters of policy concerning the management of the company's property according to the statements that have been previously given to the public, are what has caused the split, though it is whispered that the published statements have not fully covered the ground upon which the struggle for supremacy has been inaugurated.

The Montana-Tonopah property ranks third in importance among the bonanzas of the Tonopah district and its heaviest stockholders are glants in the financial and mining world. In the directorate are some of the best lawyers in the west, and the ex; ectation is that the meeting will be concluded in the one day.

MINING STOCK EXCHANGE.

MINING STOCK EXCHANGE.

Little More Activity Is Shown-Star in Provo, \$22 590 was added to the amount of dividend money that Utah mines will pay during the present month. The Grand Central posted a dividend in the sum of \$12,590, or 5c a share, while the Victoria company announced its intention of paying \$10,600, or 2c a share. Checks in payment of each will be issued on the 15th to shareholders of record on the day previous.

The properties of each company are giving a good account of themselves these days and dividends are now being looked forward to as a regular thing. The action of these companies swells the total amount of dividends declared by Utah properties so far this month to \$25,500. The Silver King paid \$100,000 on Monday, the Duly West will check out \$108,000 on Frelay and the Uncle Sam \$5,000 on the 221.

There is a probability that other companies will be heard from later in the month, but granting that the last dividend for September has been announced, the record is one and to be aslamed of, as there are a number of c mpanies that pay occasionally, as their treasuries warrant, and others that come along quarterly and semi-annually while all go to make a showing at the end of the year, which gives Utah mining a stanling that few states can boast.

BOSTON OPERATORS HERE.

Con. Moves Up a Peg.

The week opened on the mining exchange with the market showing a little more activity than usual, though it is still evident that the trading is listed by that the trading with the market showing a little more activity than usual, though it is still evident that the trading with the market showing a little more activity than usual, though it is still evident that the trading is listed with the market showing a little more activity than usual, though it is character. During the word extivation of sectional in fiscentaries, which was a stale of record of sale and advanced it cent during the best of the day. Lower Mammoth, on the other nand, was reduced in price from 37 cents to \$5½ cents and 35 cents, with May Day dancing around the 9-cent mark. Ajax went at \$2.90. Li Con. Moves Up a Peg.

Mining Notes.

Will J. Gray, who installed the new hoisting machinery at the American Flag property, has returned from camp. He says the company now has one of the finest plants in the world.

W. S. Cooke of this city has leased the Sierra group of claims in the American Fork district to I. J. Wadley of Pleasant Grove, who will work a good force of men on the property, and before long it is expected will begin sending ore down the canyon to the valley smelters.

P. D. Delmas, manager of the Gold Quartz Mining company's properties in the Bullion district, twenty-five miles south of Beowauwe station on the Southern Pacific, leaves for camp tomorrow to look after matters on that end of the line. He expects to be absent several days.

days.

Goldfield Review: A. H. Mayne of the famous No. 5 on the Sandstorm, has secured a block of ground on the February property and has started a force of men to work sinking a shaft. This lease is surrounded by a number of good leases and the owner is in hopes of obtaining something good.

The sendulud directors' meeting of the

The scheduled directors' meeting of the Boston Consolidated company for the lath has been postponed until a later date, not yet fixed. The August production of the company's mines was the biggest in their history and would have been larger but for the inability of the smelter to handle the ore which the company had to offer.

OPENING AT LOWER LEVEL

DULL DAY WITH SLIGHTLY FIRM-ER CLOSE.

in the official discount rate of the Im-perial Bank of Germany from 3 to 4 N. Y., O. & W. that after the rise in the Bank of England rate the German institution would raise the rate, but the advance of a full 1 per cent was not fully expected. The incident is a movement in the international contest now developing between the world's money market. The great foreign banks seem to desire to accumulate reserves in preparation for large government and other loans to be floated. It is clear that they will have to contend with pressure from New York to obtain additional funds in order to do this. Probably the action of the English and the German banks is partly a defensive measure against New York's demands.

It did not prevent a further quite violent break in foreign exchange rates here in New York, which carried the price of demand sterling within measurable distance of the rate at which gold could be engaged for import at profit. It is expected that before that rate is touched, further obstacles will be interposed in foreign markets. The price of gold was advanced in the London market today as one such obstacle. Opinions in the banking community differ as to the likelihood of an early inward mover. banking community differ as to the likelihood of an early inward movement of gold. The unprecedented loan Wabash contraction revealed by Saturday's

deorge R. Hancock is down from the rk looking after business on this end the line for a day or two. The Pioneer sampler yesterday reported four cars of ore from Bingham, two from Alta, one from Fish Springs and one from Stockton.

Colonel Nicholas Treweek, manager of the Wabash, went to camp again yes-terday morning to note the progress of development, which is understood to be growing hourly more interesting. W. S. Cooke of this city has leased the

smelter to handle the ore which the company had to offer.

Arguments in the Wall-Utah Copper company matter were concluded before Judge C. W. Morse yesterday and taken under advisement. It is hardly expected that a decision will be reached today, so the prospects are that the special meeting of Utah Copper shareholders, which went over a week ago until today, will again be postponed.

L. P. Palmer, president of the Lilburn Mining company has just returned from a week's visit to the mine, which adjoins on the north the Albion at Alta. Mr. Palmer says the tunnel is now in 250 feet and is being worked by two shifts of four men each. Recently a five-foot vein of quartz and tale, carrying good silver and lead values, was encountered. Mr. Palmer brought some good looking samples of the ore with him.

Richard Stingley of the Newhouse staff, and mides with the staff, and the

samples of the ore with him.

Richard Stingley of the Newhouse staff, and under whose direction a great deal of the early development of the Cactus was carried out, returned from a two days' visit to the property yesterday morning. Since his transfer to the offices on this end of the line Mr. Stingley has been at camp very little and the changes that have been wrought since he was in harness there have been so extensive that he feels almost like a stranger in a strange land when he goes to camp now. He states that everything is moving smoothly at both mine and mill.

mill.

Superintendent E. J. Raddatz, who was in from the Honerine again vesterday, says that the cross-cut which is being run to open new ledges on the 1,00-foot level of the mine is developing considerable water, not enough, however, to cause a suspension of the work. In general the mine, he says, looks splendid. No additional information came from the Star Consolidated yesterday, President H. G. McMillan verified The Herad's report that sulphide ore had been encountered in the bottom of the shaft, but what it was going to amount to be declared was yet too early to say. An ore body was not expected so soon, but if it makes it will be welcome, of course.

abroad, either for delivery to purchasers or to hold with funds borrowed in The settling price of copper in the local market this week has been fixed at 15½c per pound, a drop of ½c from the ruling price last week.

The effect would be to release large borrowings by the syndicate in the market. The bills of-

larger absorption of the sub-treasury, and all reports point to the continued activity of business in all lines and enormous movement of grain and merchandise over the railroads. The drain of currency to the interior is certain to continue for several weeks. It was this discouraging prospect which carried prices downwards through early dealings. The lack of urgency in the selling and some very large individual buying of a few stocks of an impressive character held the bears in cneck and the market set about a duli recovery about mid-way of the session. The government crop report had its part in this, the condition both of corn and spring wheat being regarded as fully holding the previous promase. Some positive strength in Canadian Pacific. St. Paul and Smelting and a notable.

The deficiency was estimated at 123,20,000 bushels. The effect of these figures was to completely offset the depressing influence of lower quotations at Liverpoof and neutralize the market effect of clear wheater in the northwest. As the upward trend gained headway an influential bull became quite active on the buying side. In consequence sellers became more wary. The result was a steady advance in prices. The government crop report had its part in the northwest. As the upward trend gained headway an influential bull became quite active on the buying side. In consequence sellers became more wary. The result was a steady advance in prices. The government erop report had its part in the northwest. As the upward trend gained headway an influential bull became quite active on the buying side. In consequence sellers became more wary. The result was a steady advance in prices. The government erop report was about as had been generally expected. The market closed strong with prices at the highest point of the day. Final quotations on December were 1 up at 83½.

The close was a trifle depression. The government crop report was about as had been generally expected. The market closed strong with prices at the highest point of the day. Final quotati holding the previous promise. Some positive strength in Canadian Pacific.
